**ELECTION OF SPECIES PURSUANT TO 37 CFR 1.499**

Sir:

In response to the restriction requirement made in the above-captioned patent application mailed on June 20, 2007, Applicant elects Group I with traverse. Applicant traverses the restriction requirement on the grounds that the compounds in which X=-O- and those in which X=-NH- share a common skeleton and have a common cholinesterase functionality whereby both groups of compounds are suitable for combating attention deficit disorders.

In light of the above, Applicant respectfully requests that the Examiner withdraw his holding of lack of unity.

Respectfully submitted,

Tuvia Rotberg, (58,167)
